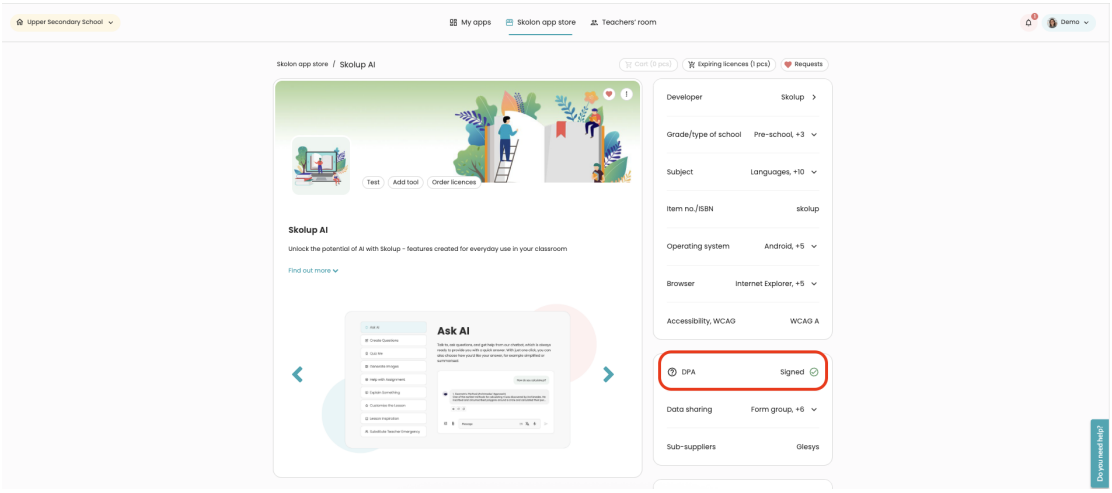
Show or hide DPA status in Skolon App Store

Clara Hardarsson - 2026-11-23 - Manage data and security

As an organisation administrator, you can specify in Skolon's **Data Visualisation** whether information regarding the status of **Data Processing Agreements (DPAs)** for suppliers should be shown in Skolon App Store, as per the following example:



The feature is activated as follows:

- Open **Data Visualisation** from My Apps.
- Click **Data Protection** in the left-hand menu.
- Then, select "Show status for DPA agreements in the Library." By default, this status is hidden.
