Complete a purchase in Skolon Store

Clara Hardarsson - 2026-02-11 - Guides for purchasing through Skolon

Here's the English translation of the text you provided:

As an administrator or teacher, you can make purchases via Skolon. A purchase is made directly through Skolon Store.

- Log in to Skolon and click on Skolon Store icon in the main menu.
- Search for the tool you want to purchase licenses for.
- On the tool's information page, you can read more about it and choose the license type.
- You can choose between two ways to purchase the license – buy and distribute the license to users directly at the time of purchase, or buy licenses without direct assignment (i.e., if you are an administrator, you can distribute them to users at a later time).
- Depending on your organization's or school's settings, you may need to select a purchasing right. If so, click "Select" to choose one of the purchasing rights you have in your available purchasing rights. *Tip:* In this step, under "Desired delivery date," you can choose when the licenses should be delivered. This means you have the opportunity to prepare license purchases before, for example, the start of a new term or similar, and fill in the date you wish to have the licenses delivered in Skolon.

When you feel ready, click "Order licenses." Done!
