

## Deny access for specific tools at an approved supplier

Clara Hardarsson - 2025-08-20 - Manage data and security

If you use Skolon's **approved suppliers** feature, as an organisation administrator, you can specify if any particular tool should be **blocked from access**.

This means you can choose to approve a supplier even if not all of their tools can be approved, as you can control access at the tool level. Here's how to do it:

- Click **Data Visualisation** in "My apps."
- Click **Data Protection**.
- Search for or scroll to the supplier you intend to edit.
- Click on the relevant supplier.
- **Check the box** next to the tool you want to deny access to. Click **Reject**.

The screenshot displays the 'Data protection' section of the Skolon interface. At the top, a search bar and a 'Tools' button are visible. The main content area shows a tree view for 'UPPER SECONDARY SCHOOL' with 28 tools and 30 users. The tools are organized into three rows:

- Row 1:** One Play, Zenty AB, Skript, ClickView, Canvas Pty Ltd, WVideo, SA Hedge, Kuba Robotics, Expert software applications..., Dugger - Digital Assessment.
- Row 2:** HomeNetFilm AB, M... (M...), Creaco, Scouting for Education, Wollschlaer, Inc. D&A Foster, 2 Simple Ltd, Levebox, Beadpioneer AB, Emery Technology AB, Learnlab.
- Row 3:** Mand Digital Solutions AB, Ugly Duckling Games, KT Education, Emery Technology AB, Librarians Program Lim., Tools for Schools Limited, 3D Learning AB, Digisiam, Local tools.

Each tool icon includes a small blue key icon, indicating its status or access level. A 'Back to My Collection' link is located in the bottom left corner, and a 'Document' icon is in the bottom right corner.
