Deny access for specific tools at an approved supplier

Clara Hardarsson - 2026-04-30 - [Manage data and security](#)

If you use Skolon's **approved suppliers** feature, as an organisation administrator, you can specify if any particular tool should be **blocked from access**.

This means you can choose to approve a supplier even if not all of their tools can be approved, as you can control access at the tool level. Here's how to do it:

- Click **Data Visualisation** in "My apps."
- Click **Data Protection**.
- Search for or scroll to the supplier you intend to edit.
- Click on the relevant supplier.
- **Check the box** next to the tool you want to deny access to. Click **Reject**.

The screenshot displays the 'Data protection' section of the Skolon interface. On the left, a sidebar lists navigation options: 'Shared data', 'Usage', 'Demo use', 'Purchase statistics', and 'Data protection'. The main content area shows a hierarchical tree structure for 'Skolon UK'. At the top, a summary card indicates '28' approved suppliers and '30' approved tools. Below this, a grid of tool icons is shown, each with a blue wrench icon indicating it is approved. The tools are organized into three rows. The first row includes One Play, Zoody AB, Skakup, ClickView, Canvas Pty Ltd, WVideo, SIA Heige, Kuba Robotics, Expert software applications..., and Dugger - Digital Assessment. The second row includes Hammer/Wire AB, Radix AB/ Mattegge..., Creaqa, Soundring for Education, Wavelength, Inc. DMA Padlet, 2 Simple Ltd, Levalbee, Revidgenet AB, Everany Technology AB, and Iseerish. The third row includes Mead Digital Solutions AB, Ugly Duckling Games, ET Education, Everany Technology AB, Licakers Program Lash..., Tools for Schools Limited, 3D Learning AS, Digisiam, and Local tests. A search bar is located at the top of the main area, and a 'Tools' button is visible in the top right corner.
