Deny access for specific tools at an approved supplier

Clara Hardarsson - 2026-04-07 - [Manage data and security](#)

If you use Skolon's **approved suppliers** feature, as an organisation administrator, you can specify if any particular tool should be **blocked from access**.

This means you can choose to approve a supplier even if not all of their tools can be approved, as you can control access at the tool level. Here's how to do it:

- Click **Data Visualisation** in "My apps."
- Click **Data Protection**.
- Search for or scroll to the supplier you intend to edit.
- Click on the relevant supplier.
- **Check the box** next to the tool you want to deny access to. Click **Reject**.

The screenshot displays the 'Data protection' section of the Skolon interface. On the left, a sidebar lists navigation options: 'Shared data', 'Usage', 'Demo use', 'Purchase statistics', and 'Data protection'. The main content area shows a search bar and a 'Tools' button. Below, a tree view is titled 'Skolon UK' and shows a hierarchy of approved suppliers. At the top, a box indicates '28' approved suppliers and '30' approved tools. The tree lists various suppliers such as 'One Play', 'Zoooly AB', 'Skolup', 'ClickView', 'Canvas Pty Ltd', 'WVVideo', 'SIA Heige', 'Kuba Robotics', 'Expert software applications...', and 'Dugger - Digital Assessment'. Each supplier has a list of tools associated with it, each represented by an icon and a name. A 'Data protection' icon (a shield with a checkmark) is visible next to several tools, indicating that access to those tools has been denied. A 'Reject' button is visible at the bottom right of the interface.
