Introduction to Skolon Pass

Ulf Kronsell - 2024-06-04 - Skolon Pass (QR codes)

Skolon Pass is a simplified log in solution for Skolon in the form of a QR code for the user to scan using the device camera when logging in to Skolon. Skolon Pass is primarily aimed towards younger students so they don't need to keep track of their log in credentials like user name and password and then quickly can be ready for their lesson. Skolon Passes are created by the Skolon administrator, more information is found in the article [Create and assign Skolon Pass](#). Availability of the Skolon Pass functionality is dependant on the organisations agreement with Skolon, but it can be purchased as an add on if it is not included in the agreement. Please contact support@skolon.eu if you have any questions.
