# Try demo-versions of tools in library

Noah Kapteijn - 2022-11-21 - Library

Do you want to try one of the tools in Skolon? Several tools in the library can be tried out through demo-versions. You can already see in the library's overview which tools have a demo version available.
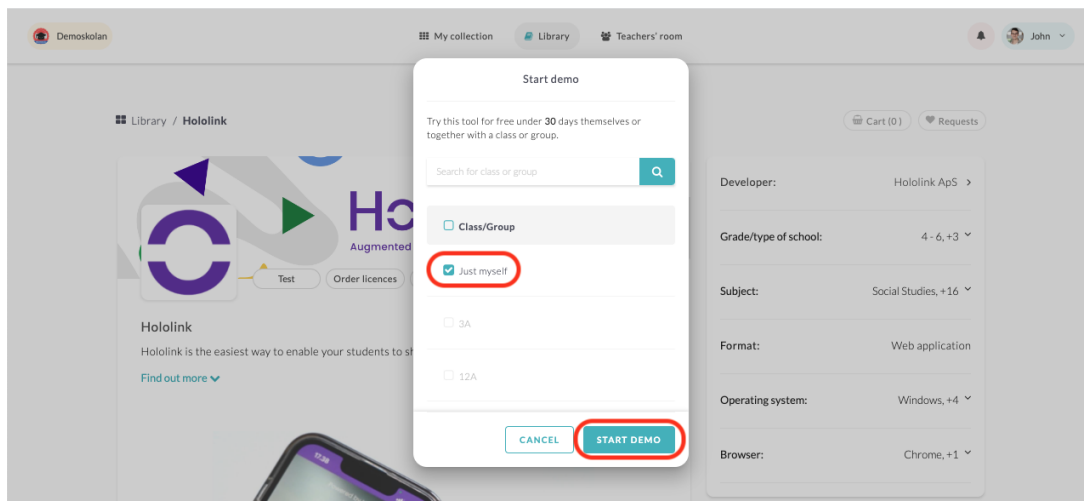

1. **Click on the library icon** at the top of the main menu (the icon with four squares).

2. The tools you can try as a demo have a **Free Trial** button.

3. If you want to start a demo, click on **Test**

4. Select whether to start the demo **Only for yourself** or **for one or more classes and groups**. Then click **Start Demo**.

After you have chosen to start a demo-version, you will find the tool in your collection, just like all your other tools.
