Manage a User's Skolon Pass

Ulf Kronsell - 2025-07-11 - [Skolon Pass](#)

As an administrator, you can manage individual users' **Skolon Passes** and either block a pass or change its security type (Simple Login or Two-factor Authentication).

Please note: If a user has "Two-factor Authentication" as their security type on their Skolon Pass (or any of them, should the user have multiple Skolon Passes), the user **must** use this pass to log in.

- Go to the **Skoladmin** tool from My Apps.
- Click on **Users** in the left-hand menu.
- Then, in the top menu, select the type of user you want to manage and search for the user's name, or scroll through the list.
- Click on the row with the user's name. In the dialog box that opens, click **Skolon Pass**.

Here you can choose to block a pass or change its security type.

- To block the pass, click the **icon** on the right.
- To change the security type, click the **drop-down menu** and select the desired security type.

Important: If you choose Two-factor Authentication, the user **must** use their Skolon Pass to log in to Skolon.

The screenshot shows the 'Settings' page for 'Skolon Grundskolan'. The left sidebar contains a menu with 'Settings' (selected), 'Users', 'Tools', 'Widgets', 'Templates', and 'Skolon Pass'. The main content area has a header with 'Settings' and three statistics: '318 Users of your school', '28 Number of classes', and '61 Available tools of your school'. Below the statistics are three sections of settings, each with a list of items and a right-pointing arrow: 'Settings' (Contact details, Adjustments, School unit codes), 'Function settings' (Home, User settings, Welcome message, Share to Classroom, Share to Microsoft Teams, Purchase rights), and 'Support' (Contact us, Request results). A 'Done' button is located in the bottom right corner. At the bottom of the page, there is a footer with '© 2025 Skolon' and a 'Back to My Collection' link.
