## Install Skolon ASM integration

Gabriel Wallén - 2025-11-11 - [Apple School Manager](#)

To install Skolons SDS integration to Apple School Manager (ASM), please follow the instructions for “Integrate with your SIS” in Apples article "[Integrate Apple School Manager with your Student Information System \(SIS\)](#)". When selecting sync data source, choose OneRoster API.

You will find the connection credentials for Skolons OneRoster API in the Skolon Data Hub under “OneRoster”

The screenshot shows the 'Skolon - Apple School Manager' connection configuration page. The left sidebar lists various sync types, with 'OneRoster' selected. The main content area is titled 'Connection details' and contains the following information:

- Client Id: [Empty field]
- Client Secret: [Empty field]
- URL for fetching access token: `https://idp.skolon.com/oauth/access_token`
- URL for OneRoster API: `https://integrations.skolon.com/ims/oneroster/v1p1`

If you are missing an entry for your ASM-configuration, please [contact our support](#) and we'll help you out.

Please note that you will have to activate at least one school and create at least one team in order to proceed with the last steps of the ASM installation guide.

The screenshot shows the 'Skolon - Apple School Manager' connection configuration page with the 'Overview' tab selected. A yellow banner at the top indicates 'Sync is disabled'. Below this, there is a section for 'Active' status with a toggle switch that is currently turned off. At the bottom, there is a section for 'Apple School Manager' with the following text:

**Apple School Manager**  
Provisions data to *Apple School Manager* via *Claris Connect*.  
**Apple School** The customer must activate a sync with *Claris Connect* and enter the connection details under the *Connection details* tab.
