Install Skolon SDS Teams integration

Gabriel Wallén - 2025-04-10 - [Microsoft / Entra](#)

To install Skolons SDS Teams integration to Entra, please follow the instructions for OneRoster API provided by Microsoft in their article [“Connect data to School Data Sync”](#).

You will find the connection credentials for Skolons OneRoster API in the Skolon Data Hub under “Microsoft Teams”

The screenshot shows the Skolon interface for "Microsoft Teams / Skolon Demo". The left sidebar lists "Synchs and data flows" with options: Overview, Synchs, Sync types, Microsoft Teams (selected), API Sync, Freja eID, and National exams. The main content area shows "Connection details" for the OneRoster API. It includes fields for Client Id, Client Secret, URL for fetching access token (https://idp.skolon.com/oauth/access_token), and URL for OneRoster API (https://integrations.skolon.com/ims/oneroster/v1p1).

If you are missing an entry for your SDS-configuration, please [contact our support](#) and we'll help you out.

Please note that you will have to activate at least one school and create at least one team in order to proceed with the last steps of the SDS installation guide.

The screenshot shows the Skolon interface for "Microsoft Teams / Skolon Demo - Teams". The left sidebar lists "Synchs and data flows" with options: Overview, Synchs, Sync types, Microsoft Teams (selected), API Sync, Freja eID, and National exams. The main content area shows the sync status. A yellow banner indicates "Synk is disabled". Below it, there is an "Active" section with a toggle switch that is currently turned off. The text below the toggle says: "If the sync is active, external integrations such as Microsoft SDS can retrieve data about your organization from Skolon."
