This is Skolon

With Skolon, you get all of the school's digital learning resources gathered in a personalised view for every teacher and student – with a single login. Click on an icon in your personal collection and your tool starts directly, with all data automatically in place! Skolon is the simplest way to work digitally in schools.

In Skolon, there is also a Skolon App Store filled with thousands of digital tools, learning resources, services and apps for the world of education. From the Skolon App Store, you can easily try out tools free of charge with your students before easily purchasing and distributing the licences.

With Skolon, the responsible authority gains full control over what user data is held by which supplier. It's easy to extract reports and stop the transfer of data – all in one place for all suppliers.

Skolon's vision is to create a better, more enjoyable and more successful school by enabling digital learning for everyone.
