

Activate Pseudonymisation

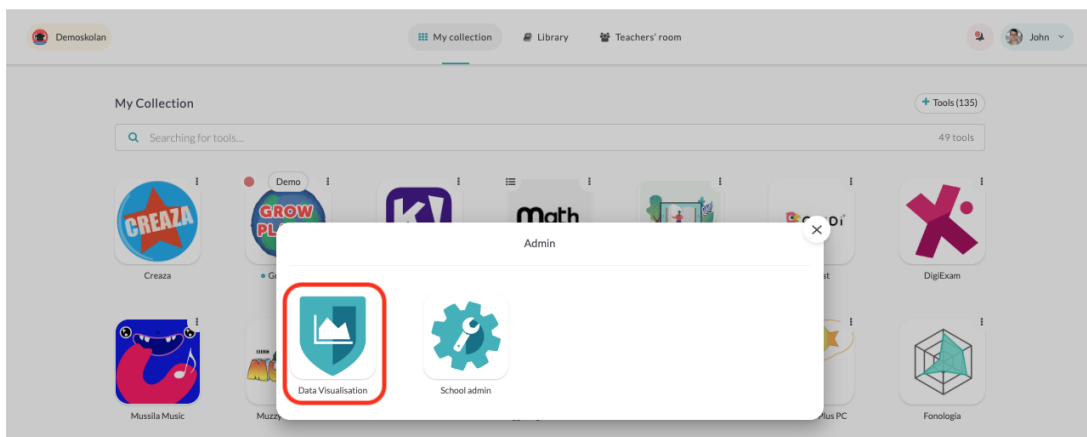

Noah Kapteijn - 2022-11-21 - Data visualisation

When you choose to pseudonymise the data sent to the provider, as below, Skolons pseudonymisation module creates fictitious names and e-mail addresses for students and teachers, as well as fictitious names of classes and groups. Teachers can see which pseudonyms have been created for the students in the **Teachers' room**.

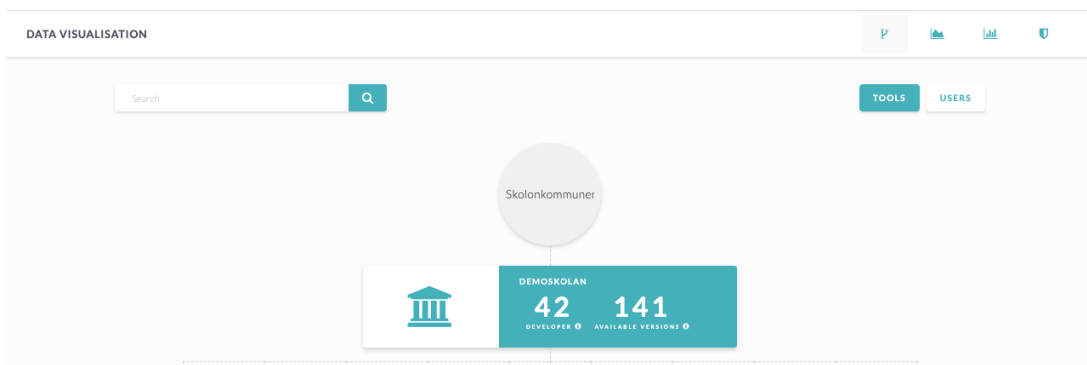

When teachers open a tool from a provider that receives pseudonymised data, they see their pseudonym inside the tool.

To enable pseudonymisation of user data to a provider, proceed as follows:

1. Open Skolon Data Visualisation.

2. Click the **Data Protection** icon in the upper right corner.

3. Search for and click on the provider to which you want to pseudonymise user data.

The screenshot shows the 'DATA VISUALISATION' interface for 'Skolonkommunen / Data protection'. It features three toggle switches on the left: 'Allow use from all suppliers in Skolon' (checked), 'Allow use only from your approved suppliers' (unchecked), and 'Show status of DPA in the library' (checked). On the right, a summary table shows: 'All your suppliers' (62), 'Approved suppliers' (2), and 'Number of suppliers with pseudonymised data:' (0). A central message box states: 'If you want to send pseudonymised data to a supplier, select that setting on the supplier page.' Below this is a search bar labeled 'Search for supplier' with a '+ SUPPLIER' button, which is highlighted with a red circle. At the bottom, a navigation bar includes 'Supplier', 'Tool', 'Permissions', 'Sub-suppliers', 'Pseudonymisation', 'Approved', and 'DPA'.

4. Enable Share pseudonymised data to supplier.

The screenshot shows the 'DATA VISUALISATION' interface for 'Skolonkommunen / Data protection / DigiExam'. It features a header with a red 'X' icon and three summary cards: 'Tool' (1), 'Permissions' (6), and 'Sub-suppliers' (5). Below these is a section titled 'Settings for DigiExam' with three toggle switches: 'DPA signed for the supplier' (checked), 'Share pseudonymised data with the supplier' (unchecked and highlighted with a red circle), and 'Mark as approved supplier' (unchecked).
