

## Activate Pseudonymisation

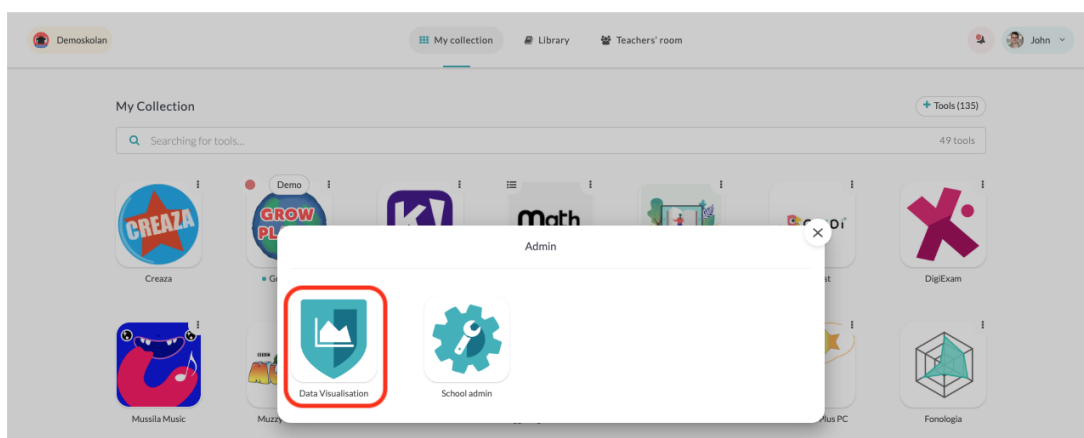

Noah Kapteijn - 2022-11-21 - Data visualisation

When you choose to pseudonymise the data sent to the provider, as below, Skolons pseudonymisation module creates fictitious names and e-mail addresses for students and teachers, as well as fictitious names of classes and groups. Teachers can see which pseudonyms have been created for the students in the **Teachers' room**.

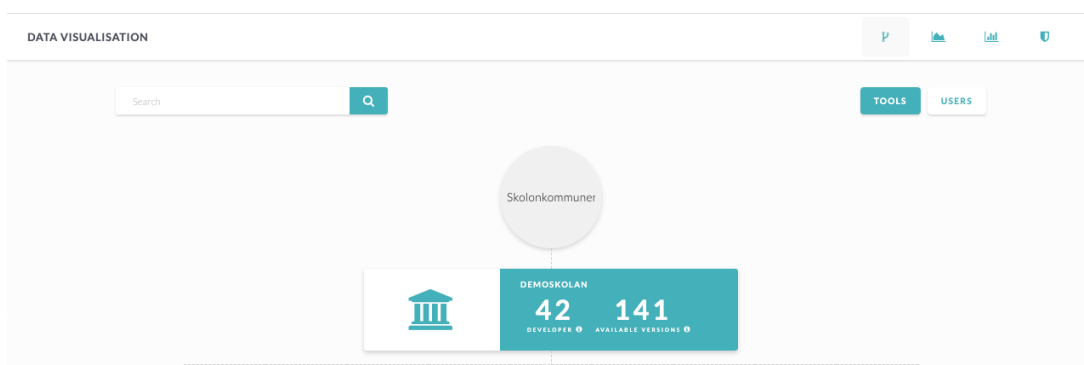

When teachers open a tool from a provider that receives pseudonymised data, they see their pseudonym inside the tool.

To enable pseudonymisation of user data to a provider, proceed as follows:

1. Open Skolon Data Visualisation.

2. Click the **Data Protection** icon in the upper right corner.

3. Search for and click on the provider to which you want to pseudonymise user data.

The screenshot shows the 'DATA VISUALISATION' interface. At the top, there are navigation icons and a shield icon. Below that, the breadcrumb 'Skolonkommunen / Data protection' is visible. On the left, there are three settings: 'Allow use from all suppliers in Skolon' (radio button selected), 'Allow use only from your approved suppliers' (radio button unselected), and 'Show status of DPA in the library' (toggle switch on). On the right, there is a summary table:

All your suppliers	62
Approved suppliers	2
Number of suppliers with pseudonymised data:	0

Below the table is a light blue box with the text: 'If you want to send pseudonymised data to a supplier, select that setting on the supplier page.' Below this is a search bar with the text 'Search for supplier' and a '+ SUPPLIER' button. At the bottom, there is a navigation menu with tabs: Supplier, Tool, Permissions, Sub-suppliers, Pseudonymisation, Approved, and DPA.

4. Enable Share pseudonymised data to supplier.

The screenshot shows the 'DATA VISUALISATION' interface for 'DigiExam'. At the top, there are navigation icons and a shield icon. Below that, the breadcrumb 'Skolonkommunen / Data protection / DigiExam' is visible. On the left, there is a red 'X' icon. In the center, there are three summary cards: 'Tool' with '1' and a green bar chart, 'Permissions' with '6' and a red bar chart, and 'Sub-suppliers' with '5' and a yellow bar chart. Below these cards is the section 'Settings for DigiExam' with three settings: 'DPA signed for the supplier' (toggle switch on), 'Share pseudonymised data with the supplier' (toggle switch off, circled in red), and 'Mark as approved supplier' (toggle switch off).
