## Arbor

Skolon Support - 2024-11-23 - User sync

In order to roster the Skolon Platform with user data from Arbor, follow the steps below.

### 1. Permission request grant

Give the Skolon application permission to access your schools. As an admin in Arbor, visit the link below and accept the permissions requested

<https://developers-portal.arbor.sc/integration/authentication/2675>

### 2. Creating schools and starting the sync

Skolon staff will create your schools and start the sync. Once it's been installed you will hear from your Skolon representative.

### 3. Validate your user data

Make sure you validate the user data coming from the new integration. Read more about how to validate the user data on the following support articles:

- [Validate user data](#)
- [Export validation file](#)
