## Install Skolon ASM integration

Skolon Support - 2025-06-11 - Integrations

To install Skolons SDS integration to Apple School Manager (ASM), please follow the instructions for “Integrate with your SIS” in Apples article ["Integrate Apple School Manager with your Student Information System \(SIS\)"](#). When selecting sync data source, choose OneRoster API.

You will find the connection credentials for Skolons OneRoster API in the Skolon Data Hub under “OneRoster”

The screenshot shows the 'Syncs and data flows' section of the Skolon interface. On the left is a sidebar with navigation options: Overview, Syncs, Sync types, OneRoster (selected), API Sync, Freja eID, Entra, Google, and National exams. The main content area is titled 'OneRoster / Skolon - Apple School Manager' and includes tabs for Overview, Schools(1), Connection details (active), and Logs. Below the tabs, it says 'Connection details' and 'The following information is used to connect to your OneRoster API.' A form contains the following fields: Client Id, Client Secret, URL for fetching access token (https://idp.skolon.com/oauth/access\_token), and URL for OneRoster API (https://integrations.skolon.com/ims/oneroster/v1p1). There are 'Rename' and 'Remove' buttons in the top right corner of the main content area.

If you are missing an entry for your ASM-configuration, please [contact our support](#) and we'll help you out.

Please note that you will have to activate at least one school and create at least one team in order to proceed with the last steps of the ASM installation guide.

Sync is disabled

Active

If the sync is active, external integrations such as Microsoft SDS can retrieve data about your organization from Skolon.

Apple School Manager

Provisions data to Apple School Manager via Claris Connect.

The customer must activate a sync with Claris Connect and enter the connection details under the Connection details tab.
