

Specify which subjects you teach to get shortcuts in the Library

Noah Kapteijn - 2022-11-21 - Library

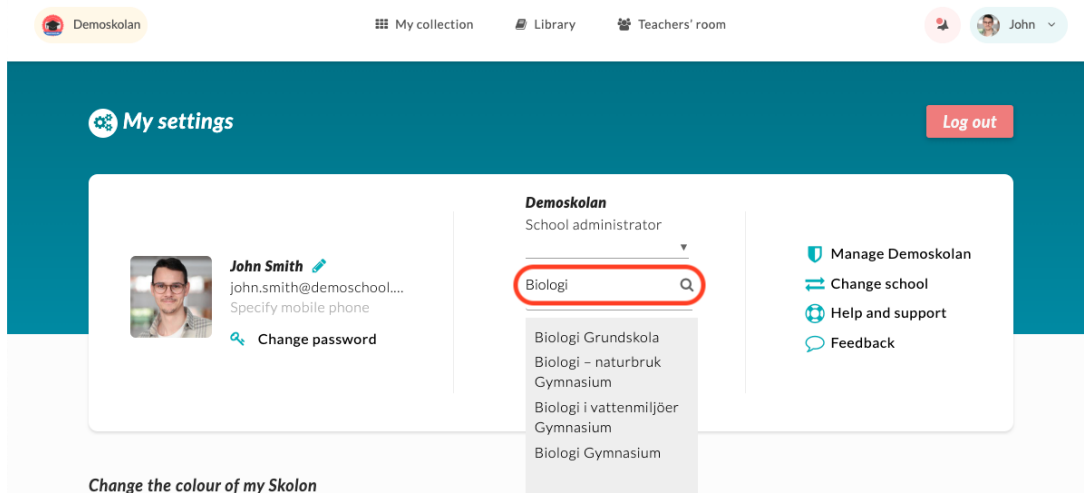

As a teacher, you can specify which subjects you teach via **My settings**. You then get shortcuts in the Library to tools in your subjects.

How to:

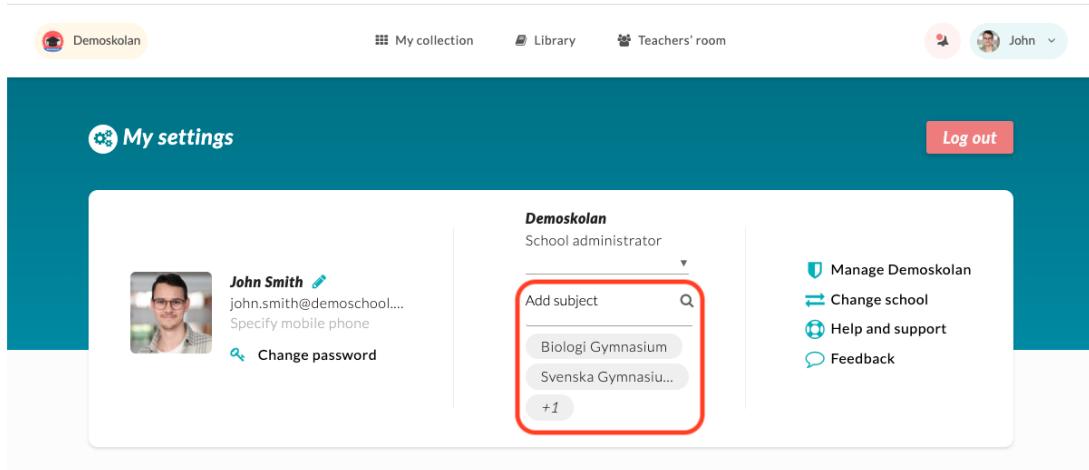

Click on the **profile icon** at the top right. Click on **My settings**.

Search for your subjects, click on the **magnifying glass**. Click on the subject.

Repeat until you have added all the subjects for which you want shortcuts (buttons for a maximum of 3 subjects can be displayed).

In the library, you will then see shortcuts for the subjects you have entered.
