

Delete a user

Noah Kapteijn - 2023-10-04 - Manage users in Skolon

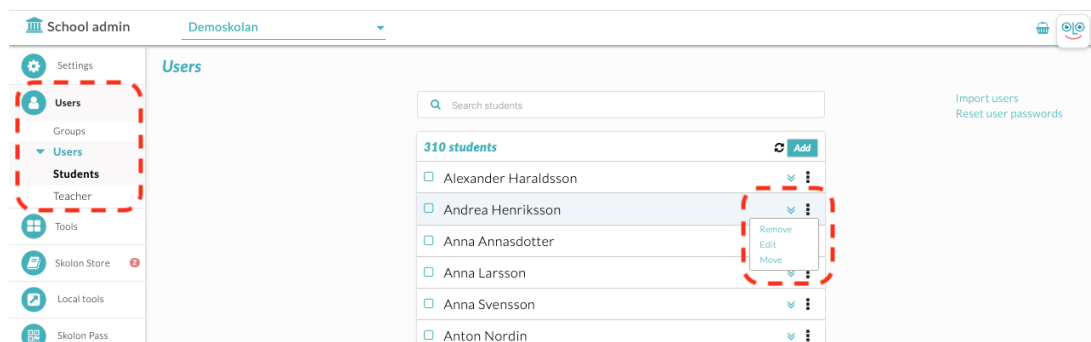

You who have an administrator account can manage all users: add, edit or delete.

If your school has your student register synced to Skolon, you delete the user in the student register. Then the user is also deleted in Skolon (which disappears after a nightly sync).

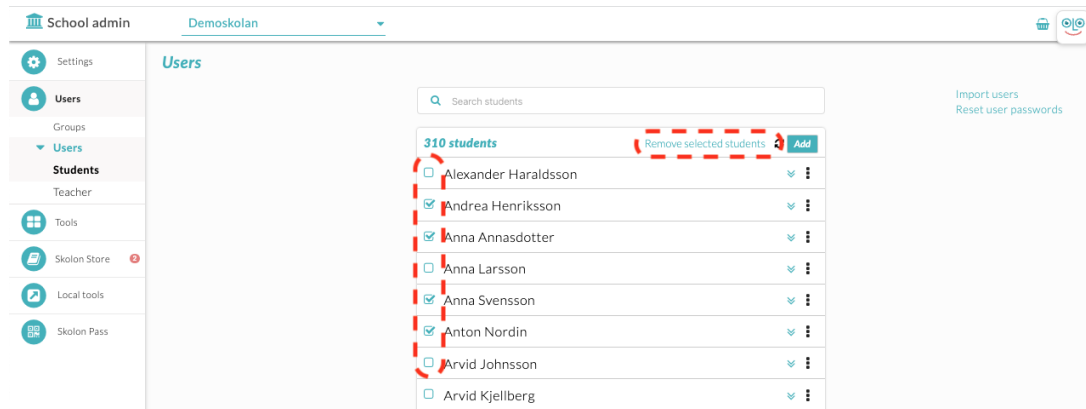

In this section you will learn how to delete users manually.

Start with:

1. Log in to Skolon.
2. Click on the **School admin icon** in your collection.
3. In the left edge you have a menu, select **Users**.
4. You get two choices: Groups and Users, select **Users**. Then select if you want to delete **Teacher** or **Students**.
5. Now you get all the users in a list. **Find the user** in the list or use the **search bar** at the top of the page.
6. In the right edge of the same line as the user, you will find a **symbol with three black dots**. If you click on it, you will see the options Delete, Change or Move. **Select Delete**, and the user will be removed from Skolon.

7. You can also delete multiple users at once: To the left of each user's name is a box. If you **check the box**, the user is selected and you can then **check several boxes**. **Remove selected users** will then appear at the top of the page. Click on it, and all selected users will be deleted.

The screenshot shows the 'School admin' interface for 'Demoskolan'. The left sidebar contains navigation options: Settings, Users, Groups, Students (with a sub-option for Teacher), Tools, Skolon Store, Local tools, and Skolon Pass. The main content area is titled 'Users' and features a search bar for students. Below the search bar, a list of 310 students is shown. The first few students are: Alexander Haraldsson, Andrea Henriksson, Anna Annasdöter, Anna Larsson, Anna Svensson, Anton Nordin, Arvid Johnsson, and Arvid Kjellberg. Each student's name has a checkbox to its left. A red dashed box highlights the checkboxes for Andrea Henriksson, Anna Annasdöter, and Anna Larsson. Another red dashed box highlights the 'Remove selected students' button at the top right of the list, which also includes an 'Add' button. In the top right corner of the main area, there are links for 'Import users' and 'Reset user passwords'.

Finished!

Note: You can only remove users from Skolon in this way. For example, if you are in a class or group and select Delete, the user only disappears from the class / group - not from the School.
