

External delivery of licences

Clara Hardarsson - 2026-02-11 - [Manage tools](#)

Some of the products in Skolon Store are delivered externally, outside of Skolon. These are called "external tools" which means they do not yet have an integration for licence delivery in the platform.

Licences for external tools must be managed and assigned by the supplier from whom you purchased the licences.

The purchaser receives an order confirmation from Skolon via email, as well as information from the supplier on how licence management and assignment works with them.

When ordering an external tool from Skolon Store, it is clearly indicated as follows:

- An icon with a broken link is shown on the tool.
- The delivery method is clearly stated in the shopping basket.
- When you check out a shopping basket with external tools, a dialogue box appears informing you about this again.
- The order confirmation sent from Skolon also shows that the licences are delivered externally.

The screenshot shows the 'My apps' section of the Skolon platform. At the top, there are tabs for 'My apps', 'Skolon app store', and 'Teachers' room'. The 'My apps' tab is selected. A search bar is present above the app icons. The page displays a grid of app icons, including:

- School admin
- Data Visualisatio...
- ThingLink
- Synkra och data...
- Binogi (tidigare ...)
- Microsoft 365
- Skolup AI
- WeVideo
- ClaroRead Chro...
- Begreppa
- Stockholm
- Microsoft Teams
- Dela till Microsoft...
- UR
- Gleerups Religio...
- Book Creator
- Microsoft Teams
- Microsoft Teams Assignments

At the bottom of the page, there are buttons for 'Kom-i-gang' (Get started) and 'Tillgänglighet' (Accessibility). The page also includes a footer with various icons and a 'Sign in' link.
