Install Skolon SDS Teams integration

Skolon Support - 2025-04-10 - [Microsoft / Entra](#)

To install Skolons SDS Teams integration to Entra, please follow the instructions for OneRoster API provided by Microsoft in their article [“Connect data to School Data Sync”](#).

You will find the connection credentials for Skolons OneRoster API in the Skolon Data Hub under “Microsoft Teams”

The screenshot shows the Skolon 'Syncs and data flows' interface. On the left is a sidebar with navigation options: Overview, Syncs, Sync types, Microsoft Teams (selected), API Sync, Freja eID, and National exams. The main content area is titled 'Microsoft Teams / Skolon Demo' and includes 'Rename' and 'Remove' buttons. Below this is a tabbed interface with 'Overview', 'Schools(2)', 'Connection details' (active), and 'Logs'. The 'Connection details' tab displays the following information:

- Client Id: [Empty field]
- Client Secret: [Empty field]
- URL for fetching access token: `https://idp.skolon.com/oauth/access_token`
- URL for OneRoster API: `https://integrations.skolon.com/ims/oneroster/v1p1`

If you are missing an entry for your SDS-configuration, please [contact our support](#) and we'll help you out.

Please note that you will have to activate at least one school and create at least one team in order to proceed with the last steps of the SDS installation guide.

The screenshot shows the Skolon 'Syncs and data flows' interface, similar to the previous one, but the 'Microsoft Teams' status is now visible. The sidebar remains the same. The main content area is titled 'Microsoft Teams / Skolon Demo - Teams' and includes 'Rename' and 'Remove' buttons. The 'Overview' tab is active, showing a yellow banner that reads 'Synk is disabled' with a warning icon. Below this, there is a section titled 'Active' with a toggle switch. The text below the toggle reads: 'If the sync is active, external integrations such as Microsoft SDS can retrieve data about your organization from Skolon.'
