# Introduction to Skolon App Store

Clara Hardarsson - 2025-07-01 - Skolon App Store

In the Skolon App Store, there's a wide range of digital tools and learning resources from various providers that you can purchase, download free of charge, and try out demo versions of.

You can easily find the Skolon App Store directly from My Apps, and as the default setting, both pupils, teachers, and administrators can see the Skolon App Store. School and organisation administrators can choose to turn off the Skolon App Store for pupils and teachers. However, our recommendation is to keep the Skolon App Store open and accessible to all users so that everyone has the opportunity to be inspired and take part in the available selection.

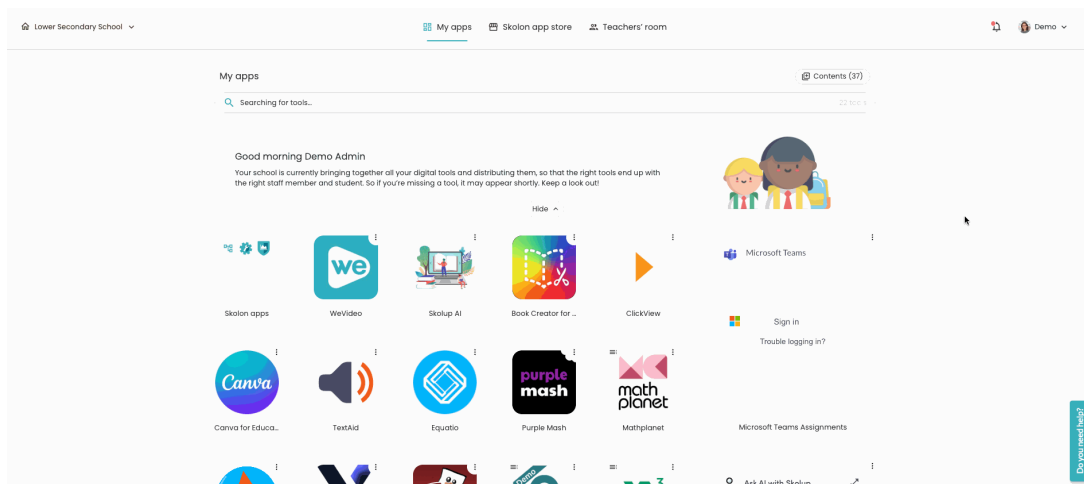

Search and quickly select

In the Skolon App Store, you can easily search for specific tools, a specific provider, author and ISBN number.

It's possible to use the filter function in the Skolon App Store to search for specific subjects, tools aimed at a particular year group, or, for example, only show free tools.

There are also direct links to things like news, as well as the tools available from your specific local authority.

Support

In the support articles under the Skolon App Store category, you can find all our simple guides and manuals on how to easily add free tools, start demo versions of tools, request tools you'd like to see added to the Skolon App Store, and how to add the subjects you teach to create shortcuts in the Skolon App Store.

In the support articles under the Purchasing in Skolon category, you can read more about how to easily purchase tools and assign licences directly from the Skolon App Store, as well as the permissions required to do so.
