Introduction to Skolup

Clara Hardarsson - 2026-03-17 - Skolup

Welcome to a brand new version of Skolup!

We have developed the tool to make AI even more useful, secure, and integrated into your daily school life.

Skolup is now a natural part of the Skolon interface. Instead of only appearing as an icon in "My Apps" the tool is now accessible directly from the main menu. This provides faster access and allows the tool to be used more naturally in the classroom.

Read more about how you can use the new features in the following article: Features in Skolup

Information about sub-processors

For the language models operated under **Berget AI**, all data processing takes place exclusively in Sweden. Neither we, you, nor any third party has access to the information being processed.

If you have any questions regarding the language models in Skolup, you are more than welcome to contact us.

Adjust language model settings

As an administrator, you can choose which language models should be permitted for your organization within Skolup.

Under **Administration** in Skolup, you can easily uncheck the models you do not wish to allow, and they will no longer be available for use.
