Install Skolon SDS Teams integration

Skolon Support - 2025-04-10 - Integrations

To install Skolons SDS Teams integration to Entra, please follow the instructions for OneRoster API provided by Microsoft in their article [“Connect data to School Data Sync”](#).

You will find the connection credentials for Skolons OneRoster API in the Skolon Data Hub under “Microsoft Teams”

The screenshot shows the Skolon web interface. On the left is a sidebar with the Skolon logo and the title 'Syncs and data flows'. Below this are several menu items: 'Overview', 'Syncs', 'Sync types', 'Microsoft Teams' (which is highlighted with a blue background), 'API Sync', 'Freja eID', and 'National exams'. The main content area is titled 'Microsoft Teams / Skolon Demo' and has two buttons: 'Rename' and 'Remove'. Below the title are four tabs: 'Overview', 'Schools(2)', 'Connection details' (which is selected and highlighted in blue), and 'Logs'. The 'Connection details' tab contains the following information: 'Client id' (with an input field), 'Client Secret' (with an input field), 'URL for fetching access token' (with the value 'https://idp.skolon.com/oauth/access_token'), and 'URL for OneRoster API' (with the value 'https://integrations.skolon.com/ims/oneroster/v1pi').

If you are missing an entry for your SDS-configuration, please [contact our support](#) and we'll help you out.

Please note that you will have to activate at least one school and create at least one team in order to proceed with the last steps of the SDS installation guide.

Syncs and data flows
