Try out demo versions of tools

Clara Hardarsson - 2025-07-01 - [Skolon App Store](#)

Fancy trying out a digital learning resource in Skolon? Several tools in the Skolon App Store have demo versions available.

In the Skolon App Store overview, you can see which digital learning resources have a demo version available; you can also filter for tools that have a demo version.

- Click on the Skolon App Store icon in the main menu. The tools that have a demo version available have a 'Try' button.
- Click 'Try' on the tool you wish to start a demo of.
- Choose whether you want to start the demo for yourself only or for one or more classes/groups. Then click 'Start Demo'.

Once you've chosen to start the demo version, you'll find the tool in your My Apps, just like your other tools.

The screenshot shows the 'My apps' section of the Skolon App Store. At the top, there are navigation links: 'Lower Secondary School' (dropdown), 'My apps' (selected), 'Skolon app store', 'Teachers' room', and 'Demo' (dropdown). Below the navigation is a search bar with the placeholder 'Searching for tools...'. The main area displays a grid of tool icons, each with a 'Try' button. The tools listed include: Skolon apps, AlphaDrop, WeVideo, Skolup AI, Book Creator for ..., Microsoft Teams, ClickView, Canva for Education, TextAid, Equatio, Purple Mash, Microsoft Teams Assignments, and Ask AI with Skolup. A 'Hello Demo Admin' message is visible above the grid, and a 'Contents (36)' link is at the top right. A 'Do you need help?' button is located on the right side of the grid.
