Activate chat history in Skolup

Ulf Kronsell - 2026-11-07 - Skolup

As an organization administrator, you have the option to enable chat history in Skolup.

Getting started

In the Skoladmin tool, go to the organization level Settings / Skolup AI.

Click on the **Features** tab.

Check the box under Conversation history (see image below).

Click **Save**.

Disabling the feature

Go to Org admin / Skolup AI / Features.

Uncheck the box and click **Save**.

A prompt will appear where you must type DELETE.

Note: This is an additional security measure, as **all** chat history is permanently deleted when this feature is turned off.
