Deny access for specific tools at an approved supplier

Clara Hardarsson - 2026-02-04 - [Manage data and security](#)

If you use Skolon's **approved suppliers** feature, as an organisation administrator, you can specify if any particular tool should be **blocked from access**.

This means you can choose to approve a supplier even if not all of their tools can be approved, as you can control access at the tool level. Here's how to do it:

- Click **Data Visualisation** in "My apps."
- Click **Data Protection**.
- Search for or scroll to the supplier you intend to edit.
- Click on the relevant supplier.
- **Check the box** next to the tool you want to deny access to. Click **Reject**.

The screenshot shows the Skolon Data Visualisation interface. On the left, a sidebar lists navigation options: Data visualisation, Shared data, Usage, Demo use, Purchase statistics, and Data protection. The main area displays a grid of tool icons and supplier names. A header bar at the top shows 'Skolon UK' and '28 30'. The grid includes the following rows of data:
