## Deny access for specific tools at an approved supplier

Clara Hardarsson - 2026-05-27 - [Manage data and security](#)

If you use Skolon's **approved suppliers** feature, as an organisation administrator, you can specify if any particular tool should be **blocked from access**.

This means you can choose to approve a supplier even if not all of their tools can be approved, as you can control access at the tool level. Here's how to do it:

- Click **Data Visualisation** in "My apps."
- Click **Data Protection**.
- Search for or scroll to the supplier you intend to edit.
- Click on the relevant supplier.
- **Check the box** next to the tool you want to deny access to. Click **Reject**.

The screenshot displays the 'Data protection' section of the Skolon interface. On the left, a sidebar lists navigation options: 'Shared data', 'Usage', 'Demo use', 'Purchase statistics', and 'Data protection'. The main content area shows a search bar and a 'Tools' button. Below, a tree view is titled 'Skolon UK' and shows a hierarchy of approved suppliers. At the top, a box indicates 'UPPER SECONDARY SCHOOLS' with '28' approved and '30' pending. The tree lists various suppliers, each with a set of tools. Some tools have a wrench icon, indicating they are currently approved. A vertical 'Data protection' sidebar is visible on the right edge of the interface.
