Install Skolon ASM integration

Gabriel Wallén - 2025-11-11 - Apple School Manager

To install Skolons SDS integration to Apple School Manager (ASM), please follow the instructions for “Integrate with your SIS” in Apples article "Integrate Apple School Manager with your Student Information System (SIS)". When selecting sync data source, choose OneRoster API.

You will find the connection credentials for Skolons OneRoster API in the Skolon Data Hub under “OneRoster”

If you are missing an entry for your ASM-configuration, please contact our support and we’ll help you out.

Please note that you will have to activate at least one school and create at least one team in order to proceed with the last steps of the ASM installation guide.
