## Install Skolon ASM integration

Gabriel Wallén - 2025-11-11 - [Apple School Manager](#)

To install Skolons SDS integration to Apple School Manager (ASM), please follow the instructions for “Integrate with your SIS” in Apples article ["Integrate Apple School Manager with your Student Information System \(SIS\)"](#). When selecting sync data source, choose OneRoster API.

You will find the connection credentials for Skolons OneRoster API in the Skolon Data Hub under “OneRoster”

The screenshot shows the 'Syncs and data flows' page in the Skolon interface. The left sidebar lists various sync types: Overview, Syncs, Sync types, OneRoster (selected), API Sync, Freja eID, Entra, Google, and National exams. The main content area is titled 'OneRoster / Skolon - Apple School Manager' and includes tabs for Overview, Schools(1), Connection details (active), and Logs. Under the 'Connection details' tab, it states: 'The following information is used to connect to your OneRoster API.' Below this, there are four fields: 'Client Id' (empty), 'Client Secret' (empty), 'URL for fetching access token' (https://idp.skolon.com/oauth/access\_token), and 'URL for OneRoster API' (https://integrations.skolon.com/ims/oneroster/v1p1).

If you are missing an entry for your ASM-configuration, please [contact our support](#) and we'll help you out.

Please note that you will have to activate at least one school and create at least one team in order to proceed with the last steps of the ASM installation guide.

The screenshot shows the 'Syncs and data flows' page in the Skolon interface, similar to the previous one. The left sidebar is the same. The main content area is titled 'OneRoster / Skolon - Apple School Manager' and includes tabs for Overview, Schools(1), Connection details (active), and Logs. Under the 'Connection details' tab, there is a yellow banner that says 'Sync is disabled' with a warning icon. Below this, there is a section titled 'Active' with the text: 'If the sync is active, external integrations such as Microsoft SDS can retrieve data about your organization from Skolon.' To the right of this text is a toggle switch that is currently turned off. Below this section, there is a box titled 'Apple School Manager' with the text: 'Provisions data to Apple School Manager via Claris Connect. The customer must activate a sync with Claris Connect and enter the connection details under the Connection details tab.'
