Install Skolon SDS Teams integration

Gabriel Wallén - 2025-04-10 - [Microsoft / Entra](#)

To install Skolons SDS Teams integration to Entra, please follow the instructions for OneRoster API provided by Microsoft in their article [“Connect data to School Data Sync”](#).

You will find the connection credentials for Skolons OneRoster API in the Skolon Data Hub under “Microsoft Teams”

The screenshot shows the Skolon 'Syncs and data flows' interface. On the left is a sidebar with navigation links: Overview, Syncs, Sync types, Microsoft Teams (highlighted), API Sync, Freja eID, and National exams. The main content area is titled 'Microsoft Teams / Skolon Demo' and includes 'Rename' and 'Remove' buttons. Below this is a tabbed interface with 'Overview', 'Schools(2)', 'Connection details' (selected), and 'Logs'. The 'Connection details' tab displays the following information:

- Client Id: [input field]
- Client Secret: [input field]
- URL for fetching access token: `https://idp.skolon.com/oauth/access_token`
- URL for OneRoster API: `https://integrations.skolon.com/ims/oneroster/v1p1`

If you are missing an entry for your SDS-configuration, please [contact our support](#) and we'll help you out.

Please note that you will have to activate at least one school and create at least one team in order to proceed with the last steps of the SDS installation guide.

This screenshot shows the same Skolon interface, but the 'Connection details' tab is no longer active. The 'Overview' tab is selected, showing a status message: 'Synk is disabled' with a yellow warning icon. Below this, there is an 'Active' section with a toggle switch that is currently turned off. The text below the toggle reads: 'If the sync is active, external integrations such as Microsoft SDS can retrieve data about your organization from Skolon.'
