Try out demo versions of tools

Clara Hardarsson - 2026-02-12 - Skolon Store

Fancy trying out a digital learning resource in Skolon? Several tools in Skolon Store have demo versions available.

In the Skolon Store overview, you can see which digital learning resources have a demo version available; you can also filter for tools that have a demo version.

- Click on the Skolon Store icon in the main menu. The tools that have a demo version available have a 'Try' button.
- Click 'Try' on the tool you wish to start a demo of.
- Choose whether you want to start the demo for yourself only or for one or more classes/groups. Then click 'Start Demo'.

Once you've chosen to start the demo version, you'll find the tool in your My Apps, just like your other tools.
